

Resource 1.7

Water

Water can be flowing into and out of your school all the time. Some of it comes from the sky; some from underground pipes or wells that provide water to your school. Investigate where water is used and wasted in your school and consider how you can make the best use of this precious resource.

Location	Issue	Action	Responsibility	Priority

Set your school some **goals**.

Your goal might be to:

- Reduce water use
- Increase water efficiency
- Capture water and store it

Think about how this could be achieved?

You might consider:

- Storage: tanks, ponds, underground
- Efficiency: taps, wells, drip irrigation
- Swales to guide, slow and filter rainwater.
