

Resource 1.9

Transport

A proportion of a school's carbon emissions is linked to transportation. This can include getting to and from school as well as what the school uses and buys. This could include deliveries and the accumulated effect of many kilometres of freight that are required to bring each person or item to the school.

Survey transport related issues at the school.

Location	Issue	Action	Responsibility	Priority

Set your school some **goals**.

You goal might be to: Encourage non-fossil fuel transport.

Think about how this could be achieved?

You might consider:

- An education program to encourage walking or cycling.
